

Week-Spine Dashboard — v6 · Growth Motif

Left: current production · Right: v6 — hero upgraded to the strongest illustration in the approved set (week 28), growth-rail stepper, motif stages split (sprout = tip · bud = affirmation)

TODAY · PRODUCTION

PROPOSED · V6 · ILLUSTRATION-FIRST + GROWTH MOTIF

v6 changes — what moved since the v5 you approved

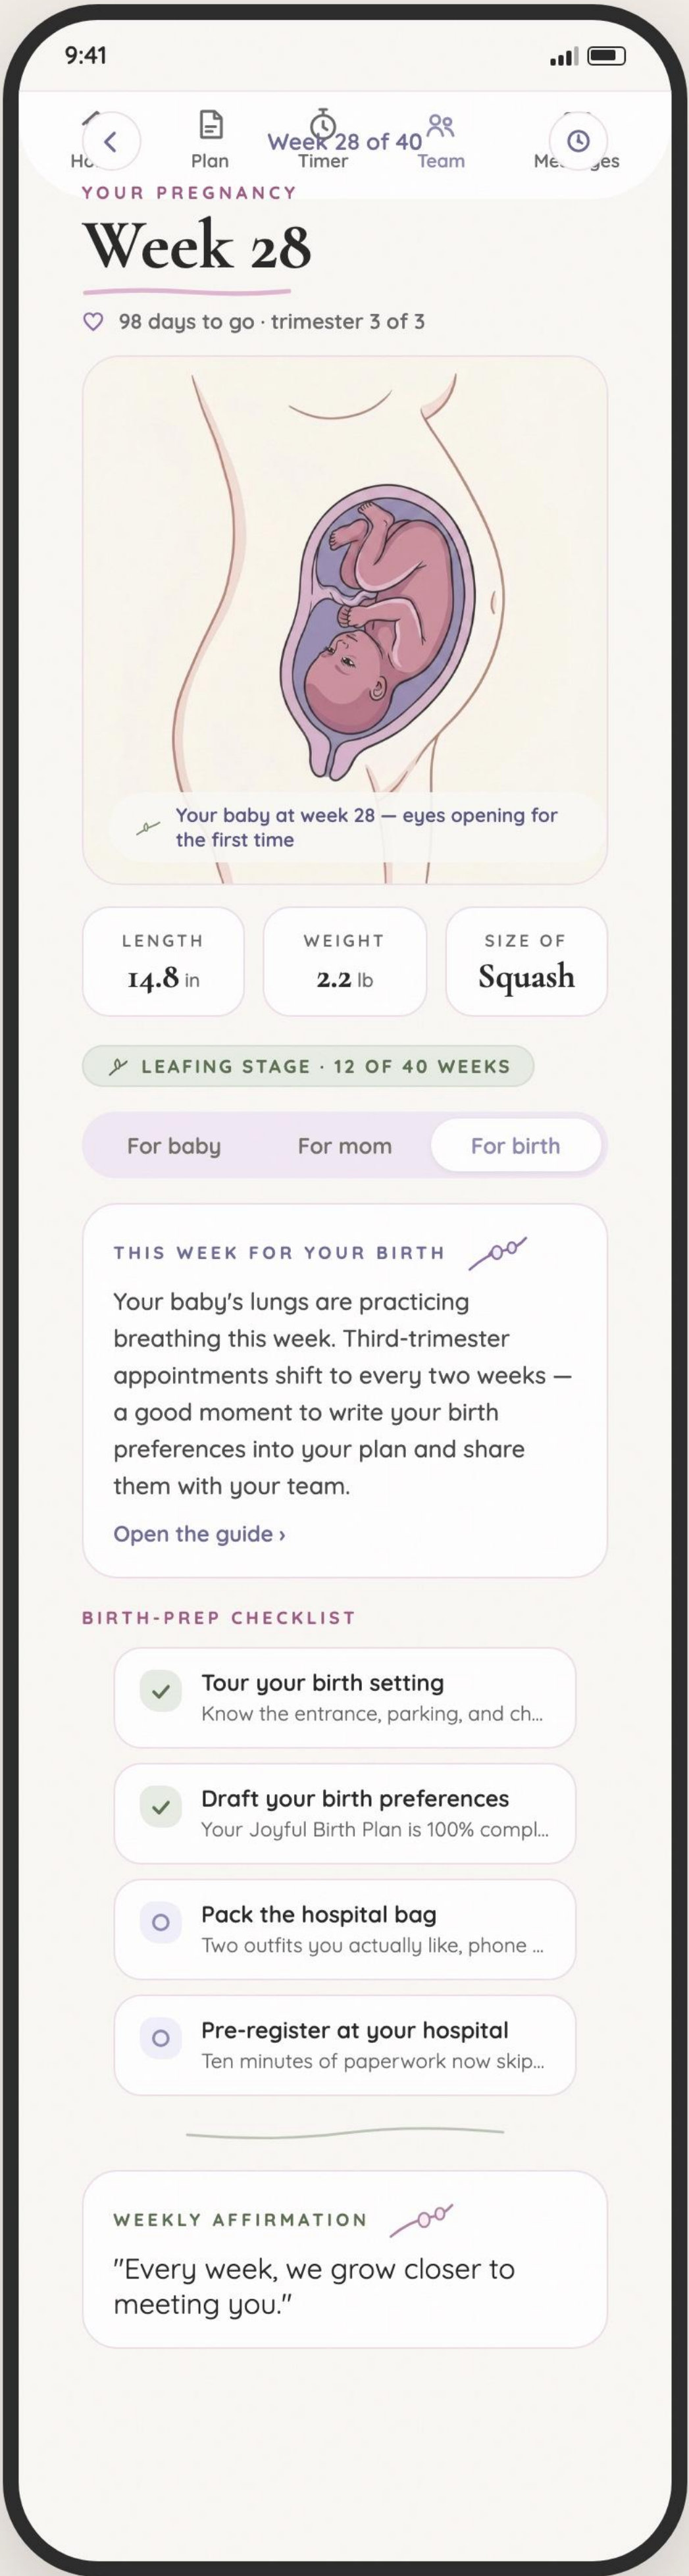

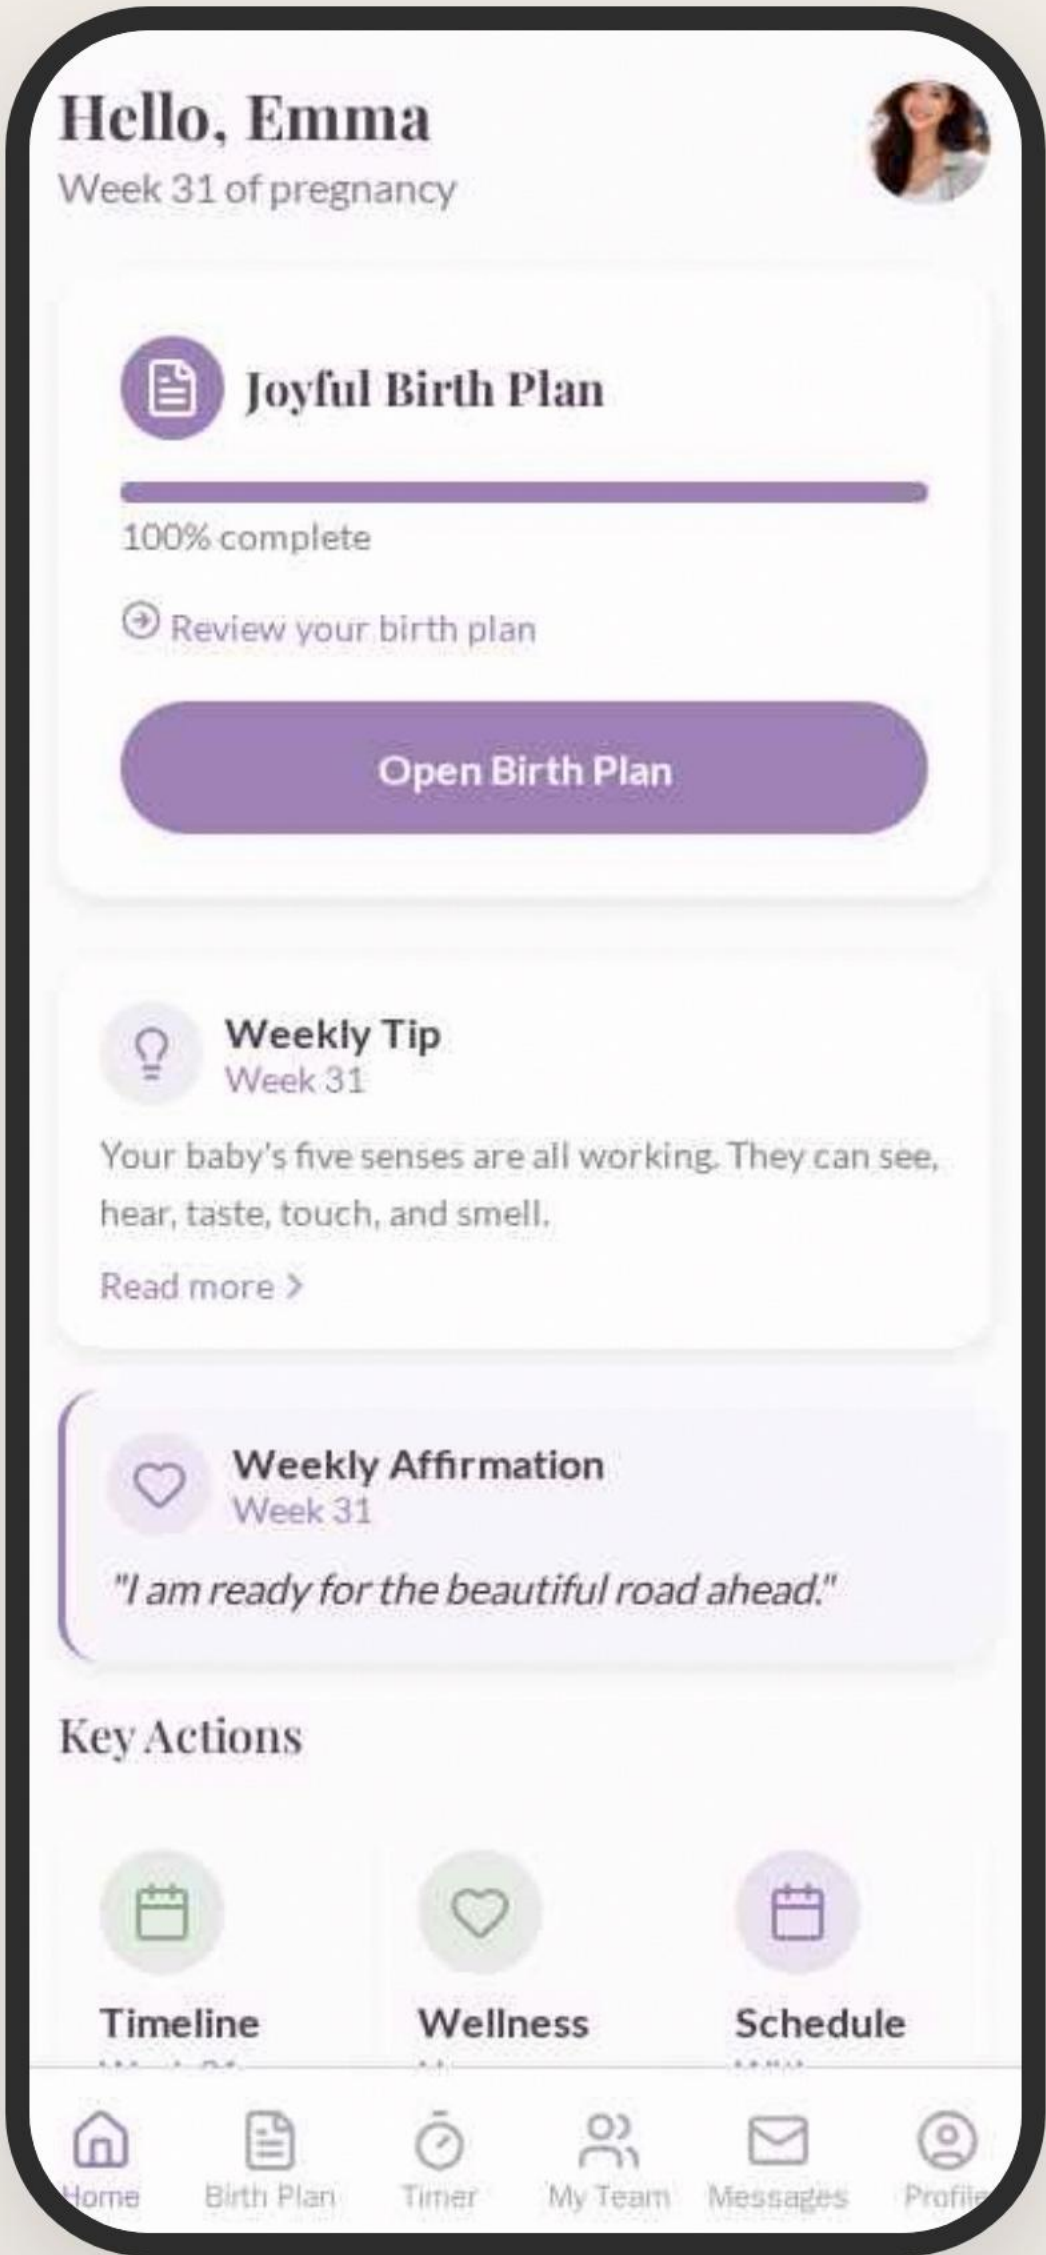

- ◆ **Hero illustration upgraded:** week 28 now leads — the strongest art in the approved set (sharper composition, cleaner line work than week 20). Week 20 stays in the series; every week keeps its own art.
- ◆ **Growth-rail stepper:** a hand-drawn stem grows beneath the completed weeks — progress you can see, the motif tied to the baby growing.
- ◆ **Motif stages split:** Weekly Tip gets the young sprout (beginnings), Affirmation gets the budding stem (almost there) — no more repeated identical sprig.
- ◆ **Organic active week:** the active week chip breaks the perfect circle (soft asymmetric radius) — one more anti-AI-look treatment.
- ◆ **Everything else holds from v5:** cream canvas, app lavender #8E8CB5, paper grain, hand-drawn icons, serif display type.

Week-Detail Screen — Week 28 · "For birth" lane

The app's core content page in the new language: approved week-28 illustration, growth-stage chip, hand-drawn check rows, stem divider — proof the design holds beyond the dashboard

TODAY · PRODUCTION

PROPOSED · WEEK-DETAIL · SAME LANGUAGE, DEEPER SCREEN

Week-detail — what this surface proves

- ◆ **Content depth:** the same language (cream, serif display, hand-drawn icons, illustration hero) carries a full scrolling content page — not just the dashboard.
- ◆ **Growth-stage chip:** "Leafing · 12 of 40 weeks" — the motif becomes a system: sprout (wks 4–14) → leafing (15–27) → budding (28–36) → blossom (37–40). The stage updates as she does.
- ◆ **Checklist rows:** organic-radius check boxes, sage done / lavender to-do — custom-icon direction extended to task UI.
- ◆ **Stem divider:** the motif as a section break — delicate stem-line instead of a plain rule.
- ◆ **Real content:** week-28 facts from the approved week-by-week data file; birth-prep items a mom would actually see.

WHERE YOU'LL GIVE BIRTH IN AUSTIN

Hospitals & birth centers, honestly

The real logistics from someone who's walked these halls with laboring moms — entrances, parking, NICU levels, and how doulas are treated.

St. David's South Austin

901 W Ben White Blvd · NICU III · Medicaid ✓

One of the busiest L&D units in the city. Doulas welcome as part of your support team — bring your birth plan; the conversation goes easier with preferences written down. Tours run twice monthly; ask about the natural birth-friendly rooms on the north wing.

Seton Medical Center Austin

1201 W 38th St · NICU III · Medicaid ✓

Central Austin near the UT campus, part of the Ascension/Seton system with Dell Children's right next door. A doula who knows your hospital's rhythm makes a real difference in labor — and Seton's lactation team is on staff seven days a week.

MEDICAID & INSURANCE IN TEXAS

Cost help, without the runaround

Texas Medicaid covers doula services as of 2024 — prenatal, labor, and postpartum support. Contact your Medicaid managed care plan to find an enrolled doula near you. Private plans vary; HSA/FSA funds can often help cover out-of-pocket costs, and several Austin practices offer sliding-scale rates.

GROWTH · YOUR JOURNEY · OUR SUPPORT

Build your Austin birth plan tonight

Free, doula-crafted, and takes about 20 minutes. Walk into St. David's or Seton with your preferences written down — and a doula-ready question list.

Judgment-free birth support · Built with doulas · Austin, TX

City page v2 — what changed from your feedback

- ✦ **Provider cards = directory profile style:** centered cards with circular photo or brand-logo avatar (logo chips on white), Cormorant initial-monogram fallback for pros without a photo, credential + practice + cost line, service pills, description, Medicaid / accepting-client status, Ambassador / Midwife / Lactation / city badges, and a Visit-website CTA — the same anatomy as the live directory, in the new skin. Two-column capable; three shown here.
- ✦ **Real provider text preserved and expanded:** full descriptions, cost ranges, and details — nothing shortened from the live data.
- ✦ **Hospitals & birth centers:** layout kept as you liked, with longer, richer text per hospital.
- ✦ **Kept from live page:** filter-bar row above the grid, Find-a-doula app band, endorsement disclaimer, List-your-business CTA.
- ✦ **Motif placement:** sprig accents in section kickers + stem divider between sections — vegetation only.

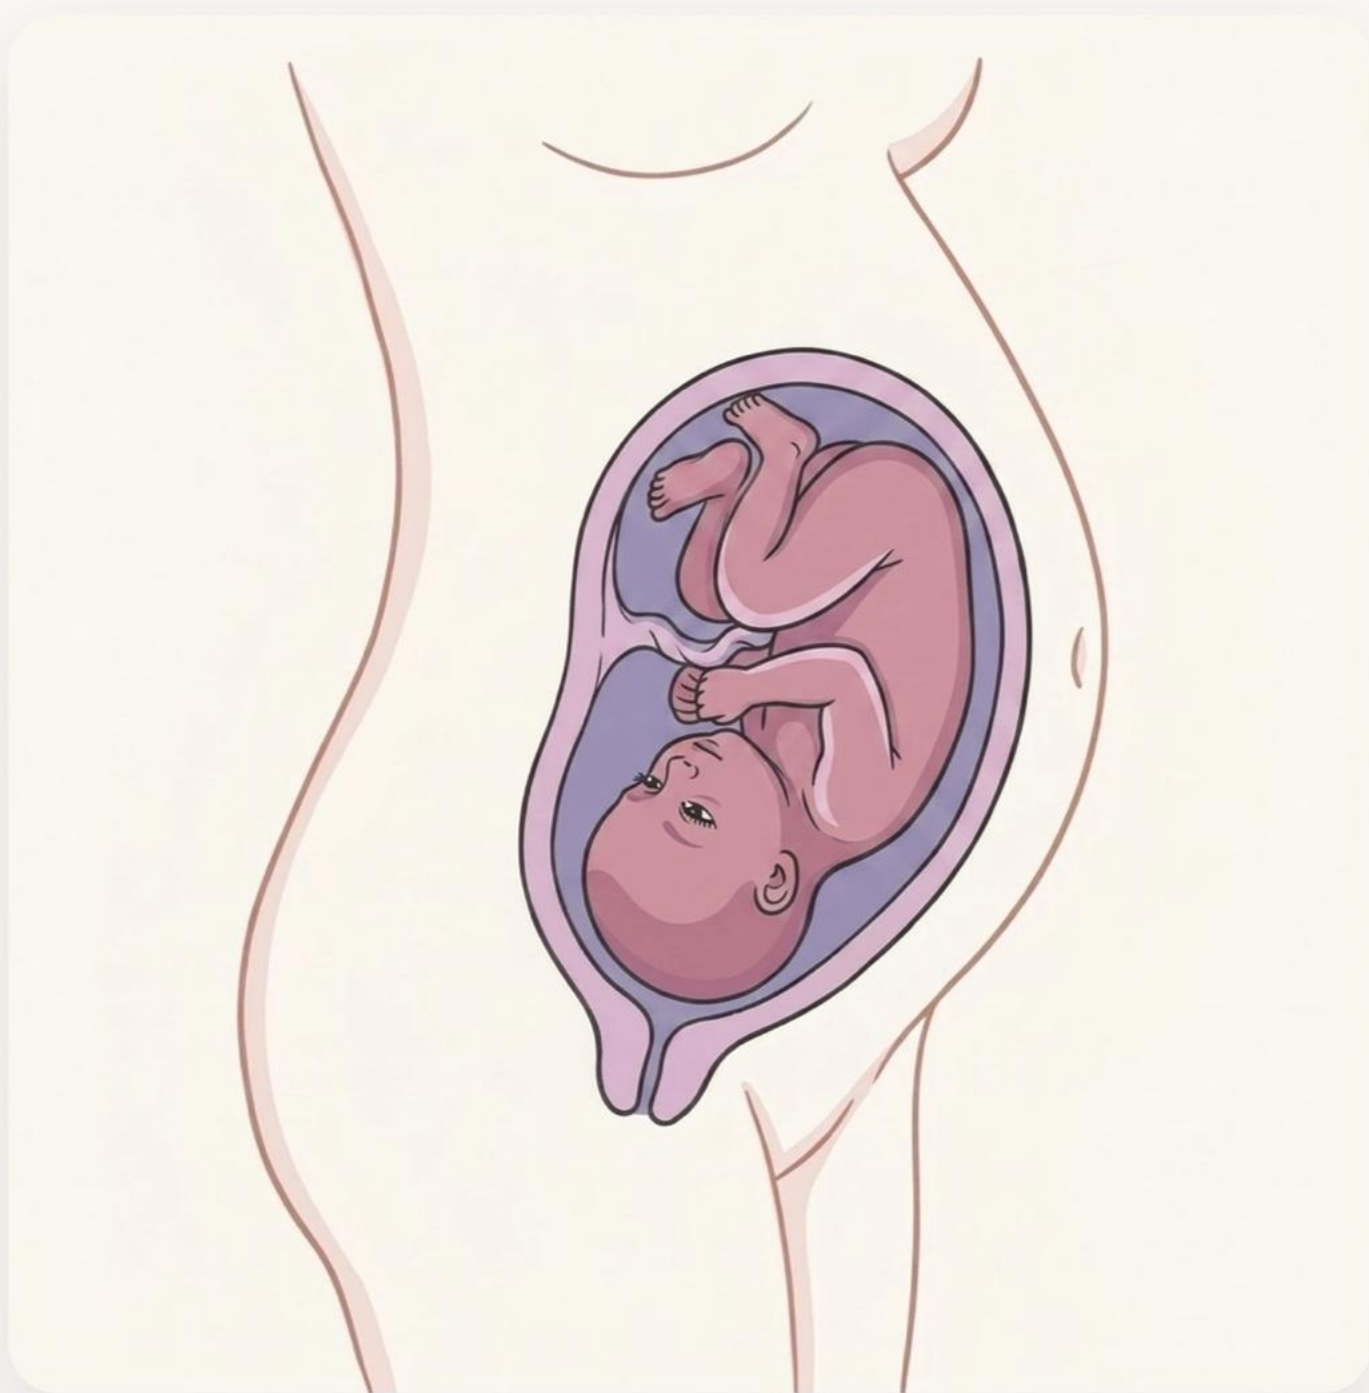

✓ FREE · DOULA-CRAFTED · JUDGMENT-FREE

Build your joyful birth plan — and grow through every week

The free app that walks with you from the first blush of pregnancy to the first cry. A doula-crafted birth plan in about 20 minutes, week-by-week guidance that grows with your baby, and a directory of verified doulas, midwives, and lactation specialists near you — [see how much a doula costs in your area](#), or [jump straight to your city](#).

✓ WHAT YOU GET

Everything you need, **nothing you don't**

The Joyful Birth Plan app — one calm home for your pregnancy, your plan, and your people. Here's what's inside.

The Joyful Birth Plan

A doula-crafted plan that walks you through every decision — pain management, support people, hospital preferences, feeding plans — free, guided, and ready to share with your care team.

Week by week, with you

Your week's illustration, your baby's size in everyday comparisons, one practical tip, one affirmation — a weekly rhythm that builds the daily-open habit and grows a garden alongside your pregnancy.

Find your team

Search real, verified doulas, midwives, and lactation specialists near you — filter by services, certification, Medicaid, and language, then message them right in the app.

✓ START WITH YOUR DATE

Find your week, **starting today**

Enter your due date and the app drops you into your current week — illustration, tip, affirmation, and checklist already waiting.

When is your baby due?

We'll estimate your current week and show you exactly what's happening — your baby, your body, and your birth plan for this exact stage.

Due date — MM / DD / YYYY

Show my week

Week 28

3RD TRIMESTER · LEAFING

Your baby is about the size of an eggplant — and this week's plan section covers pre-registration and birth preferences.

✓ THE GROWTH MOTIF

A motif that grows **with her**

Every surface carries one hand-drawn language of growth — simple stems, leaves, buds, blossoms — so the design itself grows as the pregnancy does.

Sprout

Homepage v2 — what changed from your feedback

- ✦ **Green demoted:** the trust strip went lavender/neutral, growth-strip sprouts now draw in lavender strokes, sage survives only as tiny kicker accents and fill washes — same hierarchy as the live site, where green appears almost nowhere.
- ✦ **Content depth restored:** added the live homepage's due-date calculator, city card grid, and resource index rows; hero lede now carries inline text links like the live SEO paragraph.
- ✦ **Longer, specific card copy:** the three feature cards describe real app capabilities (filters, Medicaid, messaging) instead of short taglines.
- ✦ **Scale-up test stands:** serif display headline, illustration hero, unified palette, production type system (Cormorant Garamond + Source Sans 3).
- ✦ **Motif:** 4-stage growth strip (sprout → leafing → budding → blossom, weeks mapped) — vegetation only.
