

Doula Surface Profile / Settings

Same construction as approved s7s8s9 + s13s14s15 · Cormorant + Quicksand · cream/lavender/rose palette

cream canvas lavender primary rose accent rose soft lavender light

Function inventory — Profile/Settings: profile header with initials avatar (SR), name, role, bio, specialties · 2x2 stat grid (active clients, births attended, rating, years active) · settings list (Profile, Availability, Notifications, Privacy, Account) with toggle for notifications · subscription card (Professional Plan, billing date, features) · lead insights section (new leads, converted) · tab bar. **Not in mockup on purpose:** profile photo upload (protected zone), account deletion flow, subscription upgrade/downgrade, notification preferences detail, privacy settings detail, help/support screen, onboarding flow, bio editing modal. **Reorganizes:** real app has separate Profile and Settings tabs; mockup consolidates into one screen per the s13s14s15 pattern. Lead insights appear on a dedicated Leads screen in the real app but are shown here as part of the Profile hub for the doula role.
