

TrueJoyBirthing — Phase 2: Dark Mode (mechanical reversal of the approved

Every dark value below is the mapped counterpart of a Jeff-approved light value — no redesign.

Surfaces flip to plum-black; text flips to light; midtone accents keep their hue and lift for contrast.

All dark text pairs meet or beat their light-mode WCAG contrast (body 8.5:1, kickers $\geq$ 4.9:1).

Key reversals:

cream #FAF8F5 -> #1A1520 (canvas) card #FDFCFA -> #2A2330 ink #2A2A2A -> #F5F3F6

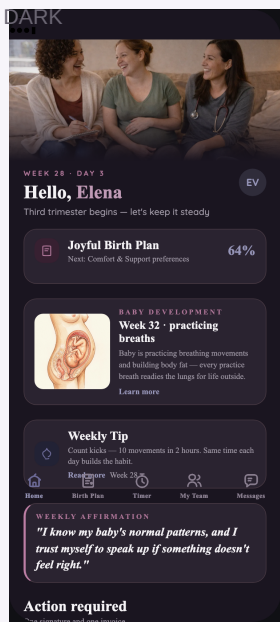

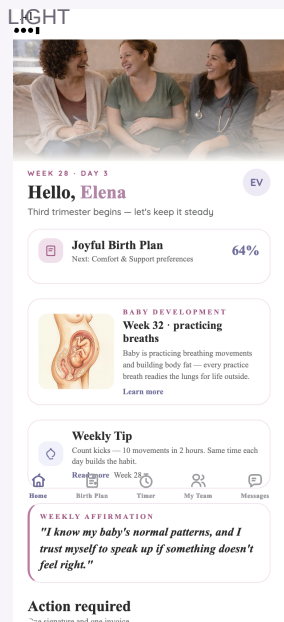

lavender pill #6E6C99 kept (white text stays 4.9:1) rose chips invert to dark-rose surfaces

photos & watercolors keep full color (brand art untouched)

Review ask: approve this map as the dark token corpus; TSX conversion follows the identical map.

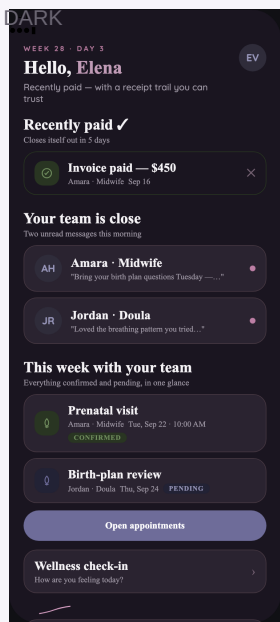

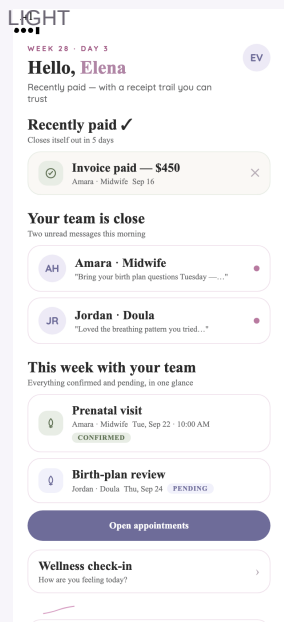

Generated 2026-09-23 - render pipeline: make-dark-variants.py -> render-dark.py -> this packet.
